Motivation/ Goal

- create comprehensive overview on immigration and its effects
- combine datasets to find correlations and trends
- provide information and foundations for discussions and policy making

MIPEX (2019)

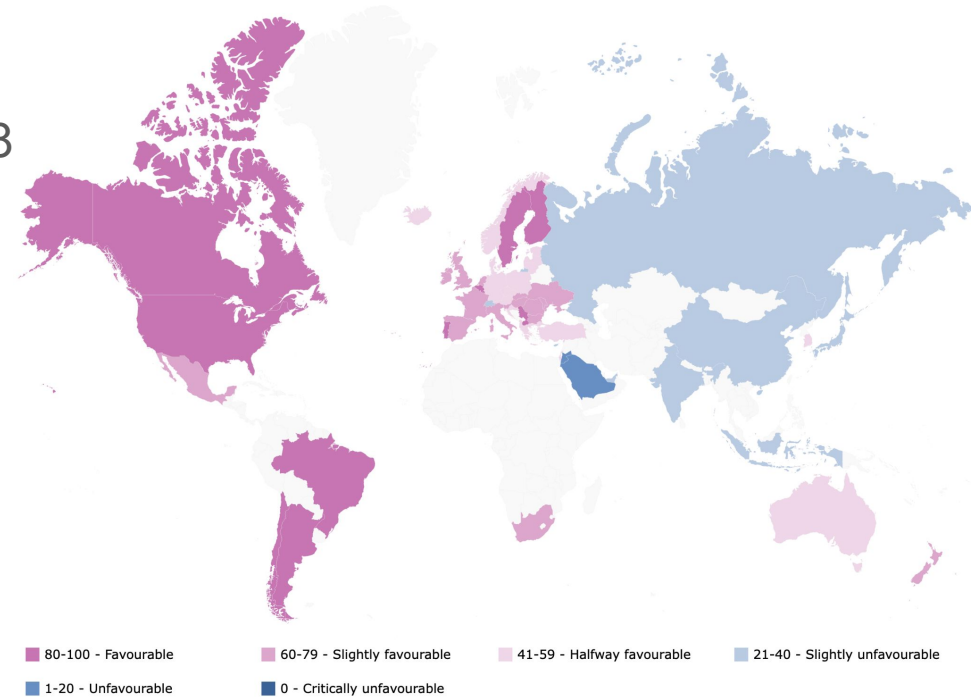

- integration policy index: scores for national integration laws and paths
- 56 nations
- scores:

overall score, labour market mobility, family reunion, education, health, political participation, permanent residence, access to nationality, anti-discrimination, basic rights, equal opportunities, secure future

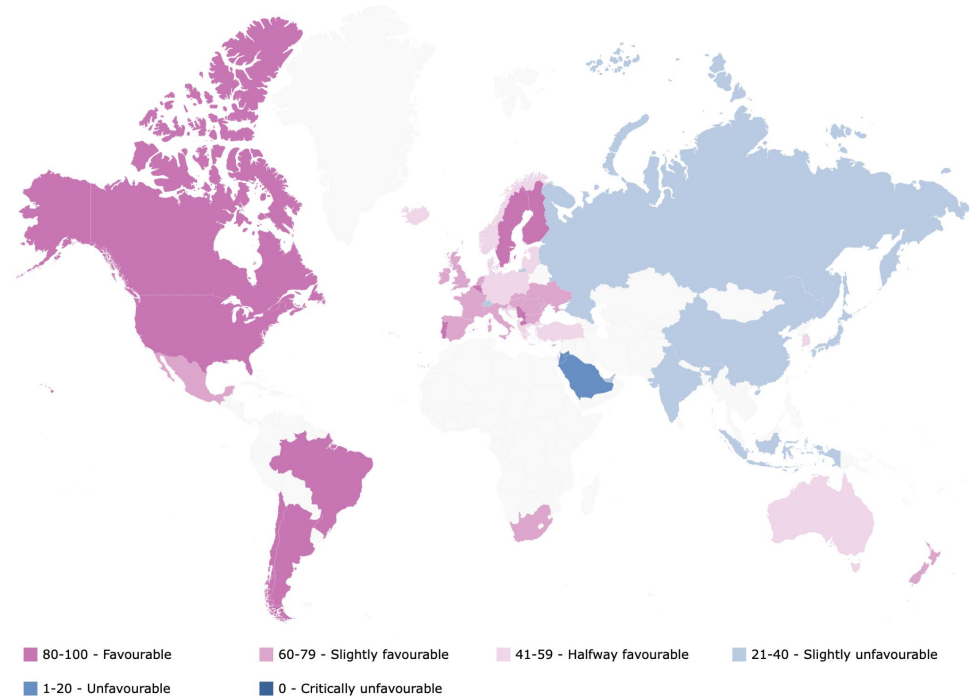

MIPEX (2019)

- Migrant Integration Policy Index
- scores government policies across 8 policy areas using 58 policy indicators
- values range from 0-100
- legal analysis of country's laws and regulations
- 2019 has biggest corpus

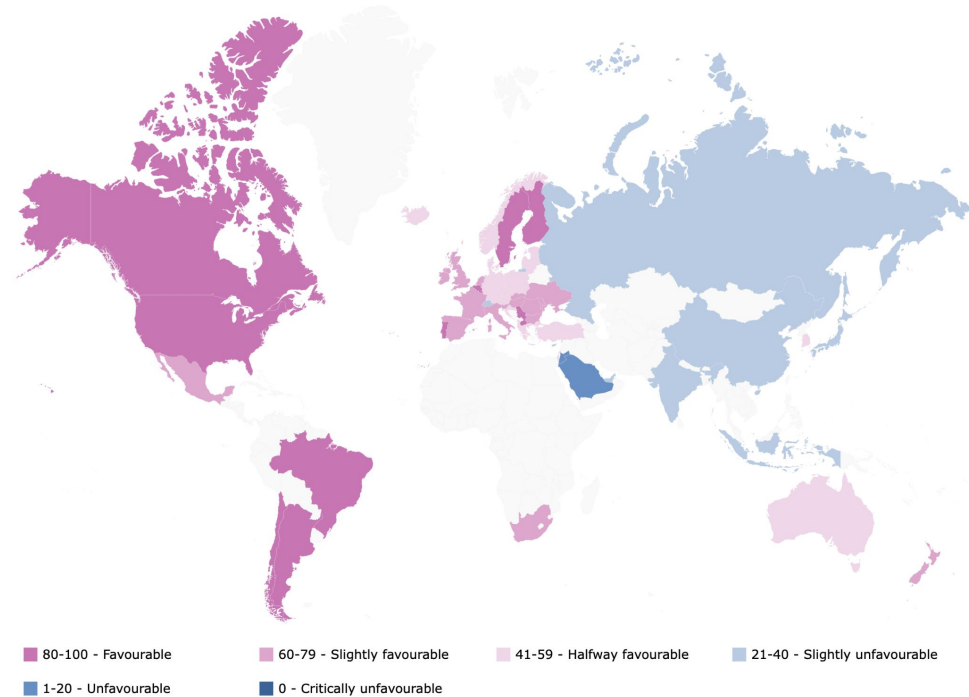

MIPEX (2019)

- recovery of structured data included manual copying from PDF to csv
- small dataset size makes manual processing valid
- role in project:
 - compare immigration numbers
 - compare prosperity
 - (including different years could illustrate change of political direction in selected countries)

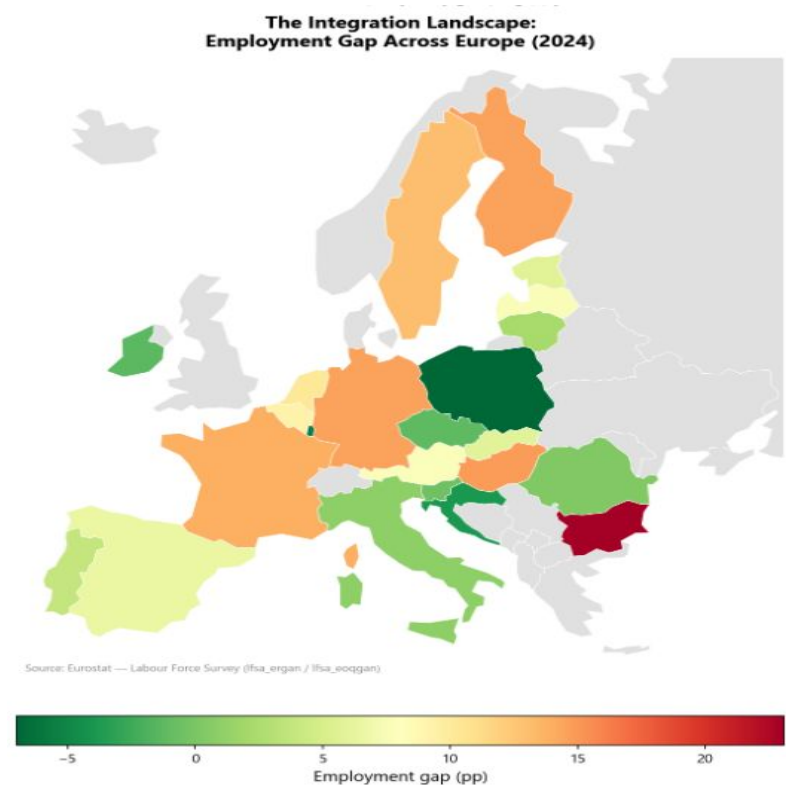

MIPEX (2019)

- recovery of structured data included manual copying from PDF to csv
- small dataset size makes manual processing valid
- role in project:
 - compare immigration numbers
 - compare prosperity
 - (including different years could illustrate change of political direction in selected countries)

What is Eurostats

Official EU statistic office provides
comparable data across countries
Covers economy, jobs, population

Who creates the data?

Collected by national offices

Standardized by Eurostats

Example: Belgium (StatBel)

Dataset Size

```
df_emp_raw = pd.read_csv('../data/raw/lfsa_ergan_raw.csv')  
print('Employment raw shape:', df_emp_raw.shape)  
df_emp_raw.head()
```

Employment raw shape: (30902, 36)

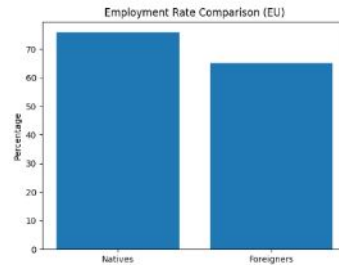

Employment Gap

Foreigners have lower employment rates

Due to language and skill mismatch

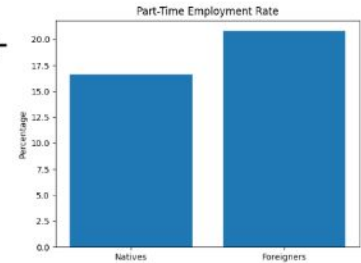

Employment Rate Comparison

Natives vs Foreigners

Part-Time Employment Gap

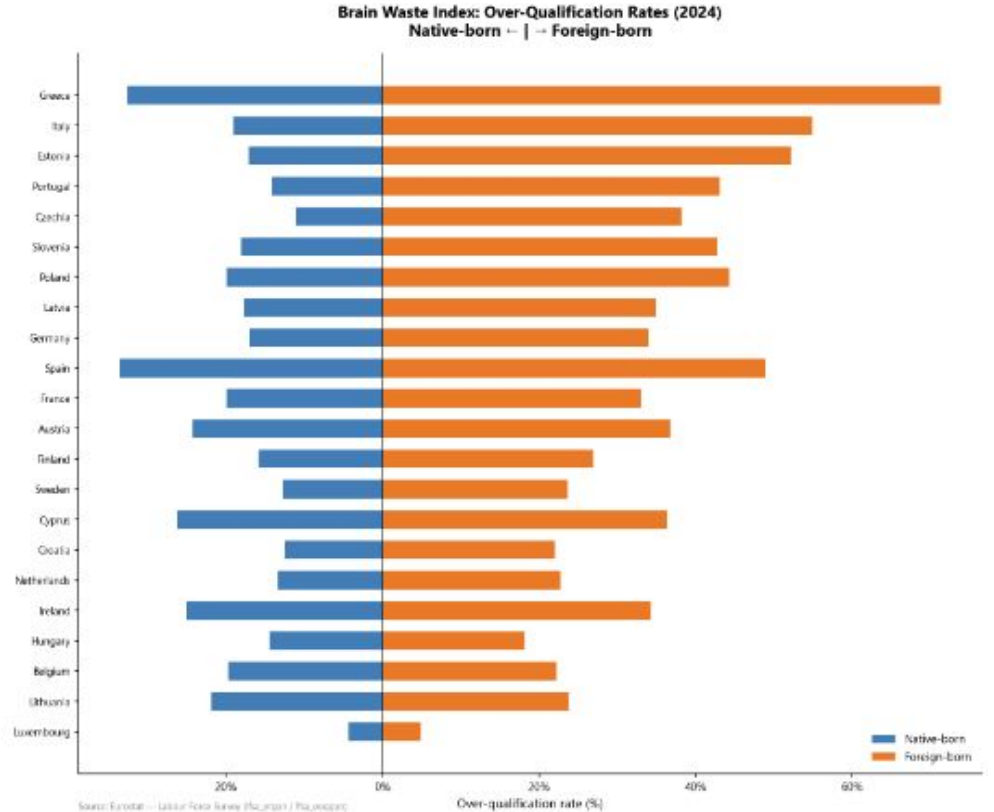

Foreigners more likely part-
Less stable jobs

Conclusion

Eurostat enables policy decisions

Gap still exists but improving

Incarceration & Public Perception

- Rising political focus on immigration and crime
- Public narratives often link immigration to higher crime rates
- Academic research suggests a more nuanced reality

**Goal = explore and visualize these patterns
using real data**

NBER WORKING PAPER SERIES

LAW-ABIDING IMMIGRANTS:
THE INCARCERATION GAP BETWEEN IMMIGRANTS AND THE US-BORN, 1870–2020

NATIONAL BUREAU OF ECONOMIC RESEARCH
1050 Massachusetts Avenue
Cambridge, MA 02138
July 2023, Revised March 2024

We thank Jing Wu for sharing historical prison admissions data from Missouri. We are grateful to Amy Finkelstein and five anonymous referees for most useful editorial guidance. We have greatly benefited from comments from Alvaro Calderón, Jenna Kowalski, Giovanni Peri, Ernesto Tiburcio Manón, Steven Messner, Carolyn Moehling, Melanie Morten, Aurelie Ouss, Jeremy Weinstein, and Gavin Wright, as well as seminar participants at the All CA-Mexico Economics of Migration seminar series, the ASSA annual meeting, Berkeley University, The Bissell-Heyd Symposium at the University of Toronto, the Center for Economic History reception at Northwestern University, Demography workshop at the University of Chicago, Harvard Kennedy School, NBER conference on Immigrants and the U.S. Economy, Royal Economics Society, Seymour E. and Ruth B. Harris Lecture Series at Harvard University, SITE conference on migration at Stanford University, University of British Columbia, University of Southern California and the WZB Berlin Social Science Center. The views expressed herein are those of the authors and do not necessarily reflect the views of the National Bureau of Economic Research.

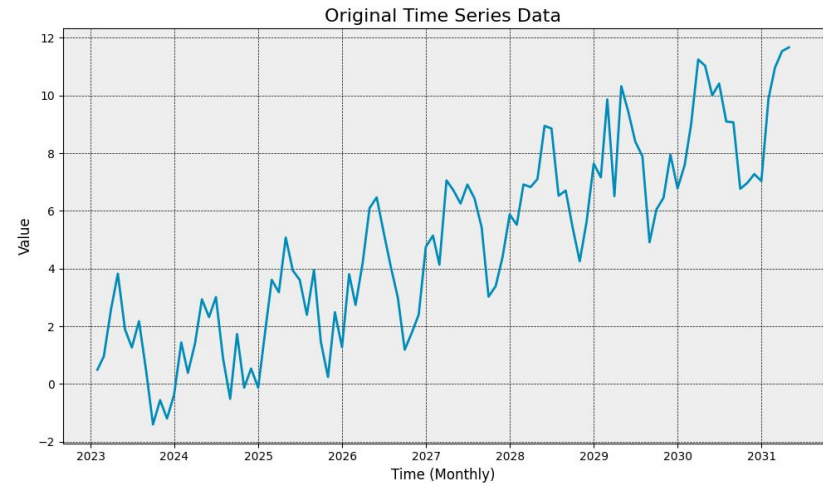

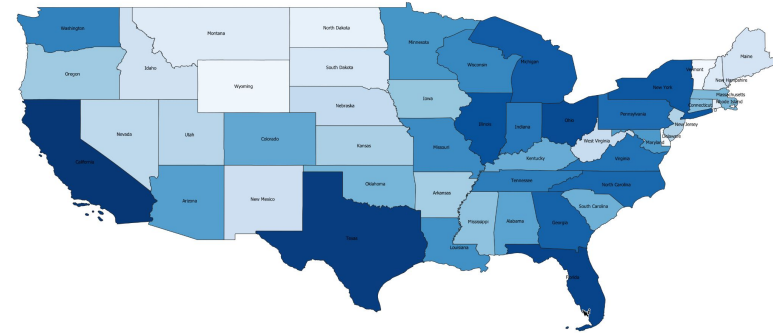

NBER working papers are circulated for discussion and comment purposes. They have not been peer-reviewed or been subject to the review by the NBER Board of Directors that accompanies official NBER publications.

Incarceration & Public Perception

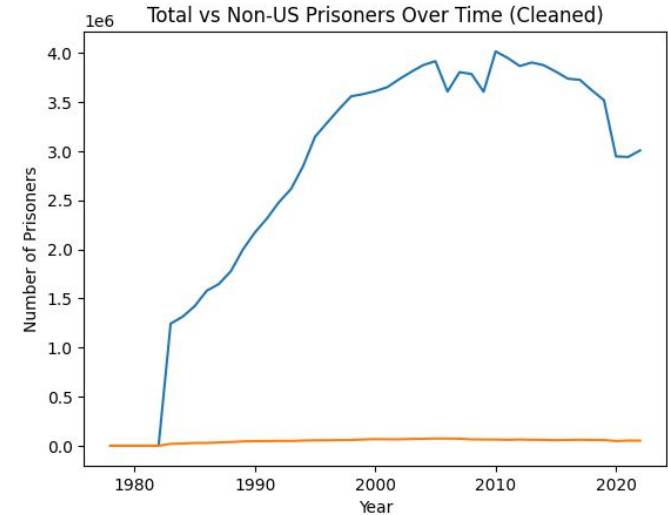

BJS National Prisoner Statistics Dataset:

- US dataset of prisoners by state and year
- US vs non-US citizenship breakdown
- ~2400 rows, 200+ attributes
- Preprocessing:
 - Handled missing values (-1, -9 -> NaN)
 - Aggregated male/female counts
 - Computed % non-US prisoners
- Visualization:
 - Choropleth map (state-level comparison)
 - Time-series trends

Incarceration & Public Perception

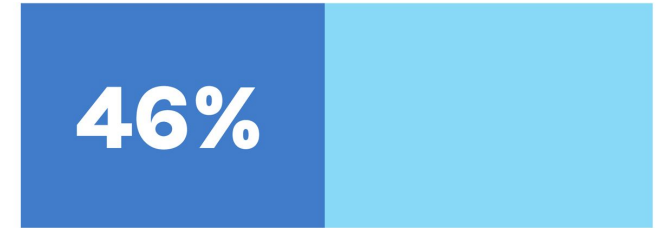

- Key issue:
 - compares citizens vs non-citizens, not immigrants vs non-immigrants
 - Naturalized immigrants counted as citizens
 - No population normalization -> no true “rates”
- Result:
 - Cannot reliably answer each research question
- Next steps:
 - Use datasets with foreign-born vs native-born distinction
 - Normalize by population
 - Explore Census / ACS-based data

Founder Origins

- Small datasets & reports on immigrant-founded companies
- Examples: Fortune 500, tech founders
- Limited size -> not suitable for full analysis
- Role in project:
 - Narrative/storytelling element
 - Highlights positive contributions of immigration
 - Complements answers on related research questions

New American Companies in 2024

Integrated Dashboard Concept

- Unified interactive world map (choropleths)
- Multiple topics (e.g. integration, economy, incarceration)
- Topic selection updates map dynamically
- Interaction flow:
 - Select topic -> map updates
 - Click country -> detailed view
 - Explore:
 - Time trends
 - Comparisons
 - Distributions
- Goal:
 - Combine multiple datasets into one intuitive interface
 - Enable multi-perspective exploration of immigration

GANTT Chart
